**DETAILED ACTION**

***Response to Amendment***

1. The amendments to Claims 1, 3 in the submission filed 6/16/09 are acknowledged and accepted. In view of these amendments, the rejections of Claim 1-6 under 35 U.S.C. 112, 1st paragraph, in Section 6 of the Office Action dated 2/25/09 are respectfully withdrawn.

***Response to Arguments***

2. The Applicants' arguments, see in particular Page 5 of the response, filed 6/16/09, with respect to the rejections of Claims 1-6, have been fully considered and are persuasive. The rejections of Claims 1-6 have been withdrawn.

***Allowable Subject Matter***

3. Claims 1-6, 9-10 are allowed.

**REASONS FOR ALLOWANCE**

4. The following is an examiner's statement of reasons for allowance:  
  
Claims 1, 3 are allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a holographic recording medium, as generally set forth in Claims 1, 3, the recording medium including, in combination with the features recited in Claims 1, 3, a single recording layer comprising a holographic recording material sandwiched from both sides by two substrates having an uneven shape

including a step in thickness; the thickness of each of the white-light reconstruction holographic recording layer region and Fourier holographic recording layer region being changed by the step height of the two substrates. Claims 2, 4-6 are dependent on Claims 1, 3, and hence are allowable for at least the same reasons Claims 1, 3 are allowable.

Claim 9 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a method of holographic recording, as generally set forth in Claim 9, the method including, in combination with the features recited in Claim 9, the step of irradiating, as an object beam, a two-dimensional pattern image to a white-light reconstruction holographic recording layer region in a holographic recording medium comprising, in a substantially identical plane, the white-light reconstruction holographic recording layer region and a Fourier holographic recording layer region, the object beam is then switched to an optical path different from an optical path used for irradiating the two-dimensional pattern image, is Fourier-transformed, and then is irradiated as an information beam to the Fourier holographic recording layer region in the holographic recording medium. Claim 10 is dependent on Claim 9, and hence is allowable for at least the same reasons Claim 9 is allowable

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
